

A250 FO-PL & A450 FO-PL are highly accurate digital Fibre Optic industrial IR Pyrometers, for non contact temperature measurement in demanding applications. The Fibre Optic Pyrometers are widely used in high ambient temperature applications without cooling and also in processes involving electromagnetic interferences. With very short response time of <2ms the pyrometer is capable of measuring fastest heating processes. The parameters such Emissivity, Response time, Analog output, Sub range, Peak picker can be adjusted remotely via PC software.

Software "Infrasoft"

AST "Infrasoft" software is under standard scope of supply. It offers possibilities of connecting three pyrometers simultaneously for parameter setting, view real time graph, offline graph and to evaluate measuring data. Communication between the pyrometer and the software is implemented via a cable connected between the pyrometer and the PC serial port. It comes with record feature, spot size calculator and parameter settings features.

Some of the parameters adjustable via software are

- Emissivity, Response Time
- Clear Time (Peak Picker)
- Analog Output
- Sub Range
- Unit Of Temperature (°C/°F)
- Communication mode (Comm. mode)
