

Compact, On-Line Infrared Non-Contact Pyrometer for glass surface temperature measurement
 200°C to 1400°C

AST TL514 series pyrometer is a digital pyrometer to provide high performance and low maintenance of non contact temperature measurement of glass surfaces & quartz surfaces in demanding industrial environments.

AST TL514 series is provided with TTL output. The emissivity, analog output sub- range, response time can be preset ex-works or adjusted through service software. This enables the instrument to be adapted to various measuring tasks.

These pyrometers have solid body in stainless steel housing which provides high operation safety even in rough industrial environment.
